## Application System Admin | IT Linux System Administrator

Detail-oriented Release & Configuration Specialist with strong experience in OutSystems, Oracle Database, and AWS environment management. Over 3 years of solid background as an IT System Administrator, specializing in server administration, automation, monitoring, deployment, and cybersecurity. Skilled in CI/CD, database management, Linux environments, and enterprise-level system support.

### WORK EXPERIENCE

**ADEC Innovations Corporation** 04/2024 – 11/2025  
**Application System Administrator** Alabang, Muntinlupa

- Managed end-to-end application deployments across Development, Testing, and Production environments.
- Configured and maintained OutSystems Lifetime for CI/CD automation and environment synchronization.
- Administered version control, rollback strategies, and dependency management.
- Ensured environment-specific configurations and runtime performance optimization.
- Executed Oracle DB release tasks: schema updates, data migrations, and patching.
- Automated Oracle database deployment scripts integrated with CI/CD.
- Managed AWS resources: EC2, RDS, S3, IAM, VPC for deployment architecture.
- Implemented infrastructure automation and monitored cloud performance.

**Z GetCare Systems Inc.** 08/2021 - 04/2024  
**Junior IT System Administrator** Clark Freeport Zone, Pampanga

- Delivered technical support using Redmine, TeamViewer, AnyDesk, and Nagios.
- Conducted hardware/software troubleshooting and OS administration.
- Managed user accounts, password resets, and application support.
- Performed network troubleshooting, email configuration, and remote support.
- Handled system monitoring, documentation, and knowledge base management.
- Installed and configured Ubuntu Server including network and security setup.
- Managed system updates, user/group management, and package administration (APT).
- Created backup and recovery strategies; implemented automation using Bash and Ansible.
- Managed services deployment, performance tuning, virtualization, and documentation.
- Configured Docker containers and Nagios for performance monitoring.
- Implemented automated monitoring via cronjobs.
- Performed incident investigation, troubleshooting, reporting, and optimization.
- Deployed Java applications via Tomcat/Jetty and managed PostgreSQL databases.
- Administered Subversion repositories and Redmine project management system.

- Automated builds, performed integration testing, and managed backup procedures.
- Implemented antivirus, firewall configurations, MFA, VPN, password policies.
- Performed security scans and response using security scanning tools.
- Created automated backup scripts via cron jobs and Bash.
- Managed retention, monitoring, and documentation of backup processes.
- Conducted vulnerability scanning, analysis, false positive identification, and reporting.
- Collaborated with development teams for remediation and follow-up scans.
- Managed wiki platform installation, access control, content creation, and reviews.
- Managed branching, merging, conflict resolution, and CI integration with Jenkins.

## **ILW Outsourcing Services**

**04/2019 - 06/2019**

### **IT Support Intern**

- Installed/configured OS and applications; monitored systems and networks.
- Troubleshoot hardware/software issues; replaced components as needed.
- Handled user account setup, password issues, and documentation.
- Performed equipment safety checks, network cabling, and PC assembly.
- Assisted agents with dialer system usage.
